

ROCKFORD ROBOTICS

'we think outside the 'bots

CENTRAL ILLINOIS REGIONAL

The Central Illinois Regional provided a learning experience for our team. It was great to see everyone work together while enjoying themselves.

We went from the high of climbing on Thursday to disappointment when our robot lost communications in the 1st two matches Friday. We recognized some issues and went to work to correct them. In just a few hours, we updated the robot for better maneuverability, hanging, and gear intake. By our last match we were doing 3 gears plus hang. That sets us up nicely going into Midwest Regional.

Midwest Regional

You can watch the Rockford Robotics compete at the FIRST Midwest Regional on March 31 - April 1. Use the link below to access live stream video.
